Senior JavaScript Developer with 7+ years of experience building scalable, high-performance web and mobile applications. Currently working as a React Developer with deep expertise in React.js, React Native, and modern JavaScript ecosystems. Experienced in developing user-centric products for large-scale platforms, modernizing legacy applications, and improving application performance by up to 35%.

Skilled in frontend architecture, component-driven development, performance optimization, and cross-team collaboration through code reviews and agile delivery. Actively expanding into full-stack engineering with extensive hands-on learning in backend architecture using Node.js, Express.js, and MongoDB within the MERN stack. Passionate about building end-to-end scalable applications and delivering reliable, high-quality user experiences.

Open to opportunities in India, Canada, and remote global roles.

🧩 CORE SKILLS

- Frontend React.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Context API UI & Styling Tailwind CSS, Responsive Design, Cross-Browser Compatibility
- Backend Node.js, Express.js, MongoDB, REST APIs, JWT Authentication Tools & Platforms Git, GitHub, Firebase, CI/CD, Jira Development Practices Agile, Scrum, Performance Optimisation

📁 KEY PROJECTS

03/2026 – Present

Developer Portfolio Platform – Personal Branding & Project Showcase, Full-Stack Portfolio System with Admin Dashboard and Content Management

- Developed a modern developer portfolio platform using React.js and Tailwind CSS to showcase projects, experience, and technical skills.
- Built a dedicated admin dashboard to manage portfolio content dynamically, including projects, experience, skills, and profile information.
- Implemented centralized state management using Redux Toolkit to efficiently handle portfolio data updates and UI state.
- Designed responsive UI components and dark/light theme support to ensure consistent user experience across devices.
- Integrated backend services using Node.js, Express.js, and MongoDB to enable dynamic content management and API-driven updates.

Highlight: React.js | Redux Toolkit | Node.js | Express.js | MongoDB | REST APIs | Tailwind CSS | Responsive UI | Admin Dashboard

02/2026 – 03/2026

Dev Tinder – Developer Networking Platform, Full-Stack MERN Application for Developer Discovery and Connection

- Built a full-stack developer networking platform using React.js, Node.js, Express.js, and MongoDB (MERN stack).
- Implemented secure user authentication and authorization using JWT with protected API routes.
- Designed scalable RESTful APIs for developer profile management, connection requests, and interaction workflows.
- Managed global application state using Redux Toolkit for efficient handling of user data, connections, and UI updates.
- Developed responsive and modern UI components using Tailwind CSS to ensure a smooth user experience across devices.
- Structured backend services with modular architecture and MongoDB schema design to support scalable user interactions.

PROFESSIONAL EXPERIENCE

02/2025 – Present
Remote

React Developer, Insight Global (Remote)

- Develop enterprise-grade web applications using React.js, JavaScript, and TypeScript with a focus on scalability, maintainability, and performance.
- Design and build reusable, modular UI components following modern frontend architecture and best practices.
- Optimize application performance, accessibility, and responsiveness across multiple devices and browsers.
- Integrate frontend applications with RESTful APIs by collaborating closely with backend teams working with Node.js services.
- Follow Software Development Life Cycle (SDLC) and Agile methodologies to ensure efficient development and timely delivery.
- Participate in sprint planning, backlog grooming, and daily stand-ups within cross-functional Agile teams.
- Conduct code reviews and contribute to maintaining high code quality, consistency, and best practices across the development team.
- Collaborate with product managers, designers, and backend engineers to deliver user-centric features and improvements.

04/2024 – 01/2025
Bengaluru

Senior Frontend Developer, Astria Digital Private Limited

- Led migration of legacy frontend applications to modern React.js architecture, improving application load times by approximately 30% and enhancing overall user experience.
- Designed and implemented scalable frontend architecture aligned with long-term product and platform goals.
- Built maintainable and reusable UI components while improving application structure and development efficiency.
- Conducted regular code reviews and mentored developers to ensure high code quality, consistency, and adherence to best practices.

- 02/2022 – 03/2024
Bengaluru
- System Analyst, Kamal Osman Jamjoom Group & Iksula**
- Developed and enhanced React Native–based mobile e-commerce applications for large-scale retail platforms.
 - Implemented responsive and reusable UI components to improve mobile user experience, performance, and application stability.
 - Optimized application performance and ensured smooth functionality across different mobile devices and operating systems.
 - Collaborated with backend teams to integrate RESTful APIs and deliver new features aligned with business requirements.
- 04/2021 – 02/2022
Gurugram
- Software Engineer, Knowlarity - Cloud Communications**
- Developed responsive web applications using JavaScript, React.js, HTML5, and CSS3, ensuring cross-browser compatibility and optimal user experience.
 - Integrated third-party APIs and collaborated with cross-functional stakeholders to deliver scalable frontend solutions.
 - Contributed to feature development across the full development lifecycle, including implementation, testing, and production support.
 - Worked closely with product teams to translate business requirements into efficient and maintainable UI components.
- 07/2019 – 04/2021
Bhubaneswar
- Senior Software Engineer, Lecturenotes Technologies**
- Migrated a large-scale Android application to React Native, supporting a user base of 500K+ active users.
 - Refactored legacy code and improved state management to enhance application performance, maintainability, and scalability.
 - Implemented reusable mobile UI components to ensure consistent user experience across the application.
- 04/2017 – 05/2019
Bengaluru, India
- Android Developer, Ladybird Web Solution**
- Developed user-centric Android applications focused on performance, usability, and reliability, delivering high-quality mobile experiences for end users.
 - Implemented industry best practices and coding standards to build stable, maintainable, and user-friendly mobile applications.
 - Mentored and supported junior developers, providing technical guidance and helping maintain development best practices across the team.

EDUCATION

- 2014
- Bachelor of Technology (B.Tech) - Information Technology,
West Bengal University of Technology**
